# iPECS ONE: Web Client

iPECS ONE

With iPECS ONE, you don't need to download a desktop app, the desktop version is done via browser. iPECS ONE is compatible with Chrome browser, Android and iOS devices.

Some of the features include:
- Dashboard for missed calls, VM, forward
- Chat
- 1:1 Video calls
- Dialpad with key features
- Contact detail with presence
- CRM Integration
- Ad-hoc conference
- Group call

Like UCE, you can login to multiple devices simultaneously.

Multiple device management - Synchronized Communication

Android devices   Chrome Browser   iPhone

- Simultaneous logging in
- Presence, Call log, Chatting continuity, Chat history
- Chatting continuity

iPECS ONE – Web Client

To log in for the first time to the Web Client, please use the link in the email you will receive in the email address set in User Setup.

Portal ID *	1009@36test.com

Dear Jess Portugal

Thanks for subscribing to iPECS ONE.

This email is to enable you to login to iPECS Cloud automatically from the iPECS ONE clients without any additional manual configuration.

If you are ready to login to iPECS ONE from your desktop PC and/or your mobile devices then please follow the information provided below.

For desktop users:

1. Make sure that Chrome has been set as your default browser and simply click on the link below

Or

2. Open Chrome and copy and paste the below link into your browser:

iPECS One login link

For mobile device users (Android, iOS):

1. Go to the app store and search for iPECS ONE to install it.

2. Scan the QR code below.

Your device will then automatically login to iPECS Cloud.
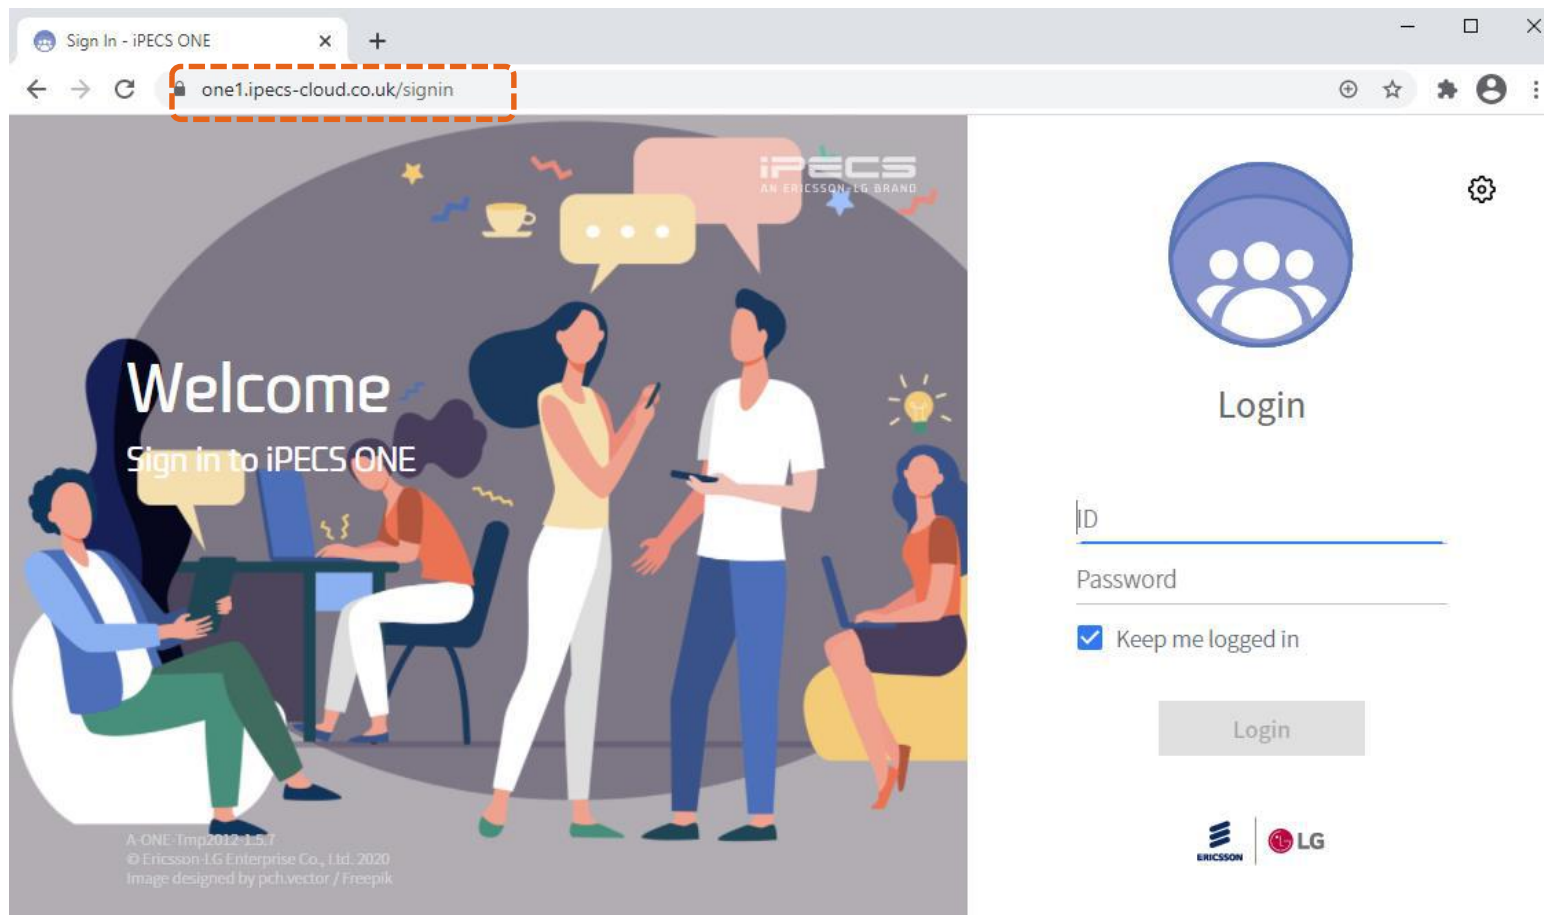

Thanks again

iPECS Cloud Collaboration

iPECS ONE – Web Client

After you log in for the first time, you can check the Home Server URL address you are logged in as and set it as a bookmark.
Once you know the Home Server URL you can then login manually if you want using the Portal ID and password.
Please note that Chrome is the only supported browser.
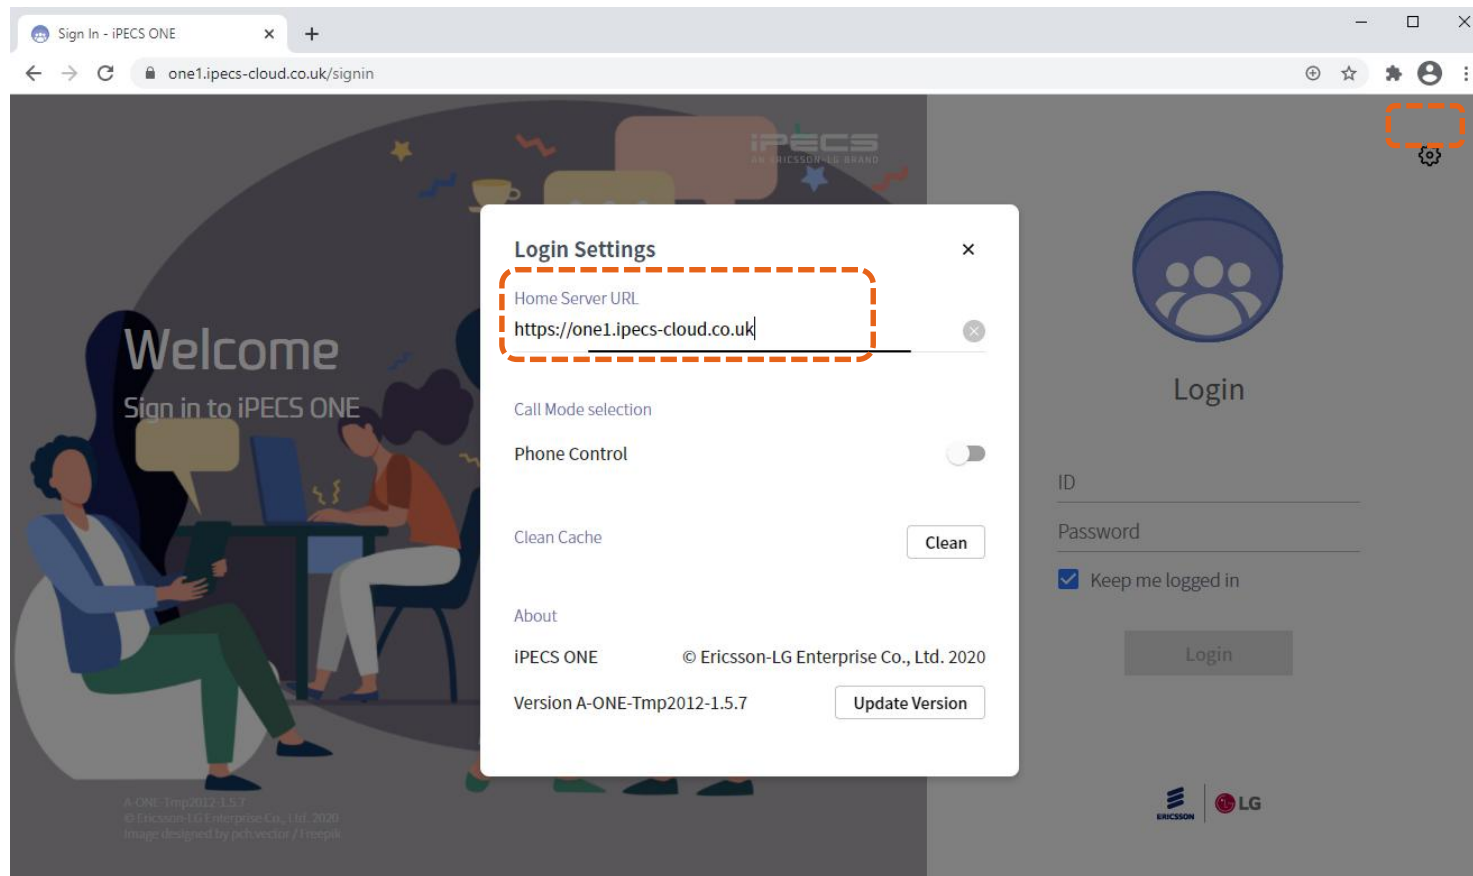

iPECS ONE – Web Client

Click ⚙ (Login Settings) button to open "Login Settings" window. On "Login Settings" window, enter Home Server URL. It can be one of three:
https://one1.ipecs-cloud.co.uk
https://one2.ipecs-cloud.co.uk
https://one3.ipecs-cloud.co.uk
Currently, this can only be found by logging in using the link sent to your email (previously slides).
Enter the Home Server URL and click "X" button to update and close the window.

iPECS ONE – Web Client

You can also choose if the Web Client will be with voice (iPECS ONE UC) or non-voice (iPECS ONE Call Control) if you have both licences assigned to the same user by enabling or not the setting Phone Control (this will be call controlling the phone).

iPECS ONE – Web Client

Login with your Portal ID and Password create on User Setup.
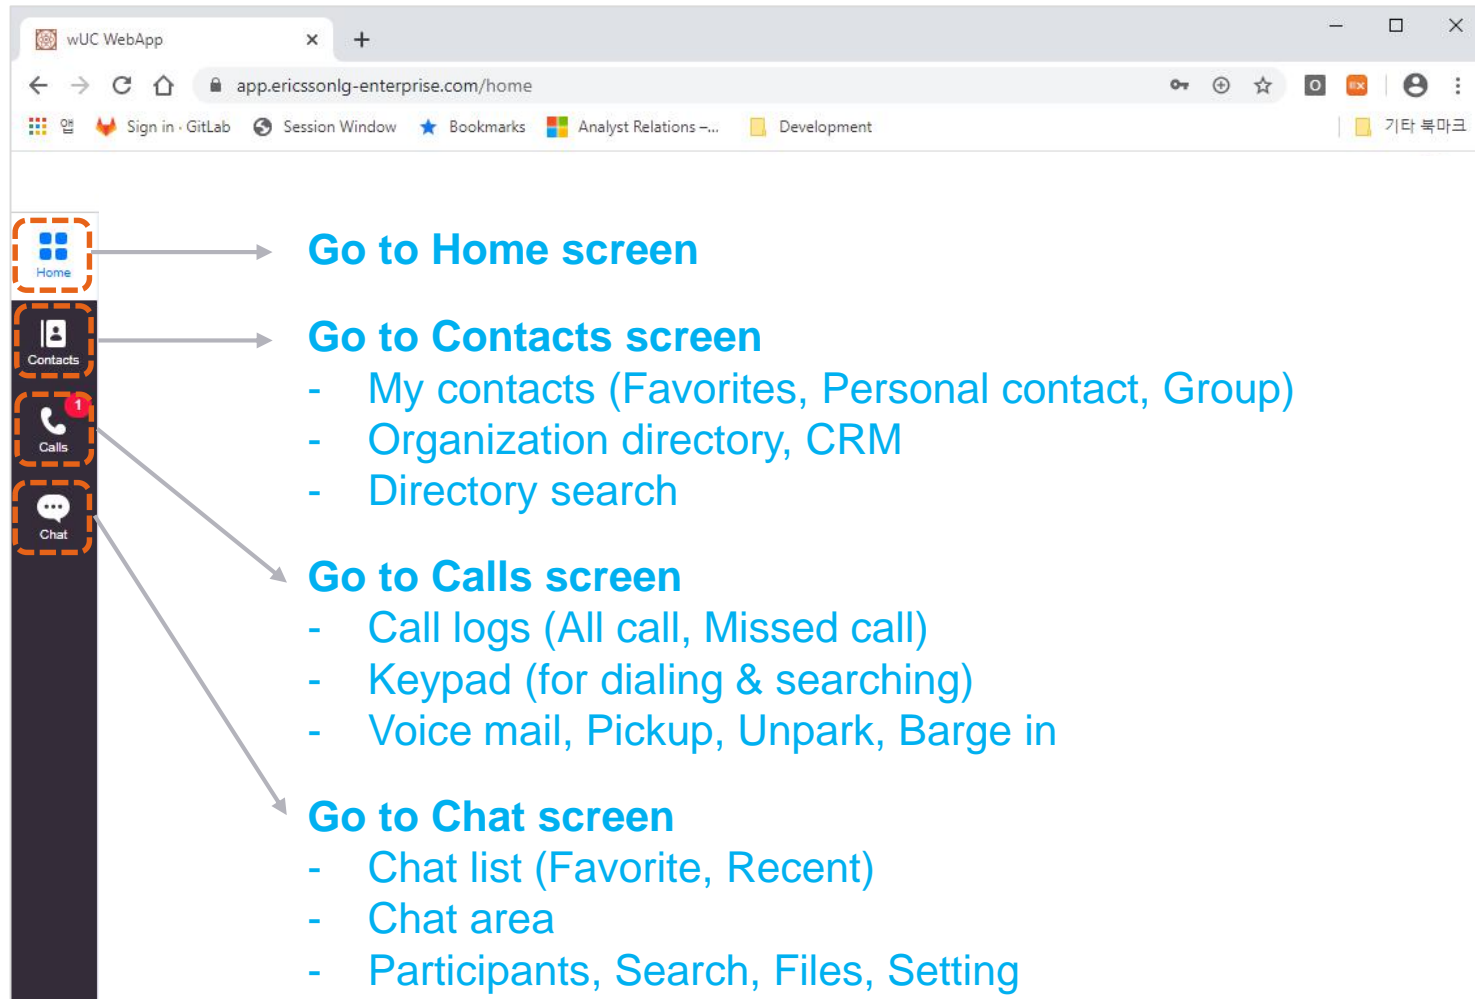

iPECS ONE – Web Client: Home

In the Home screen, you will have a dashboard with missed calls, voice mails and call forward setting. The recent chat window is also displayed. On the left you have the main menu tab and on the top of the page you have the search box, new chat icon, dial pad and user settings.
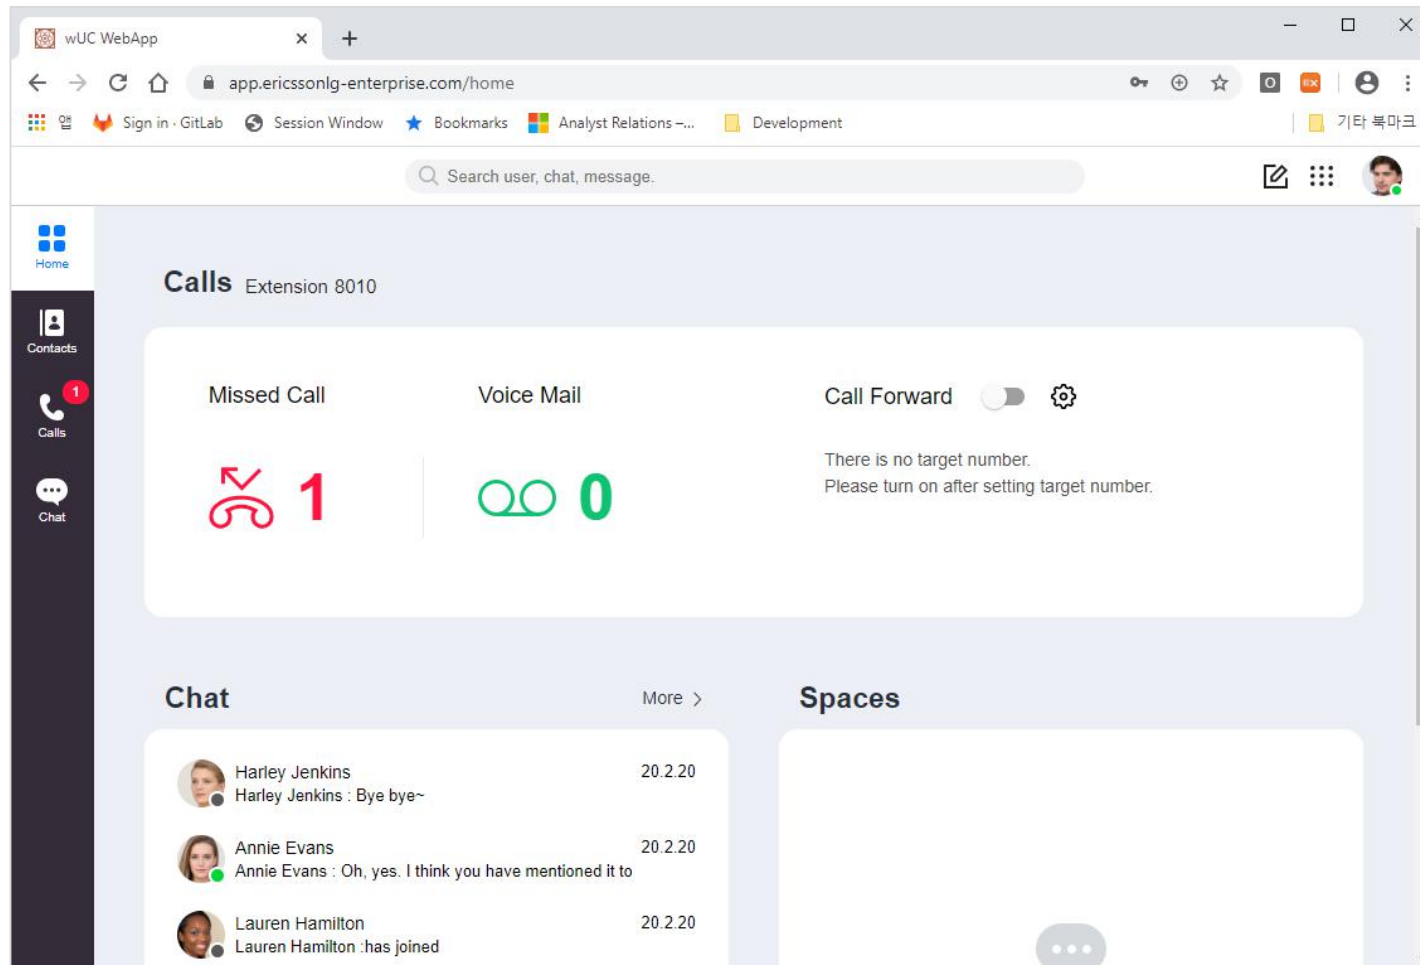

iPECS ONE – Web Client: Home

Main Menu tab.

Go to Home screen

Go to Contacts screen
- My contacts (Favorites, Personal contact, Group)
- Organization directory, CRM
- Directory search
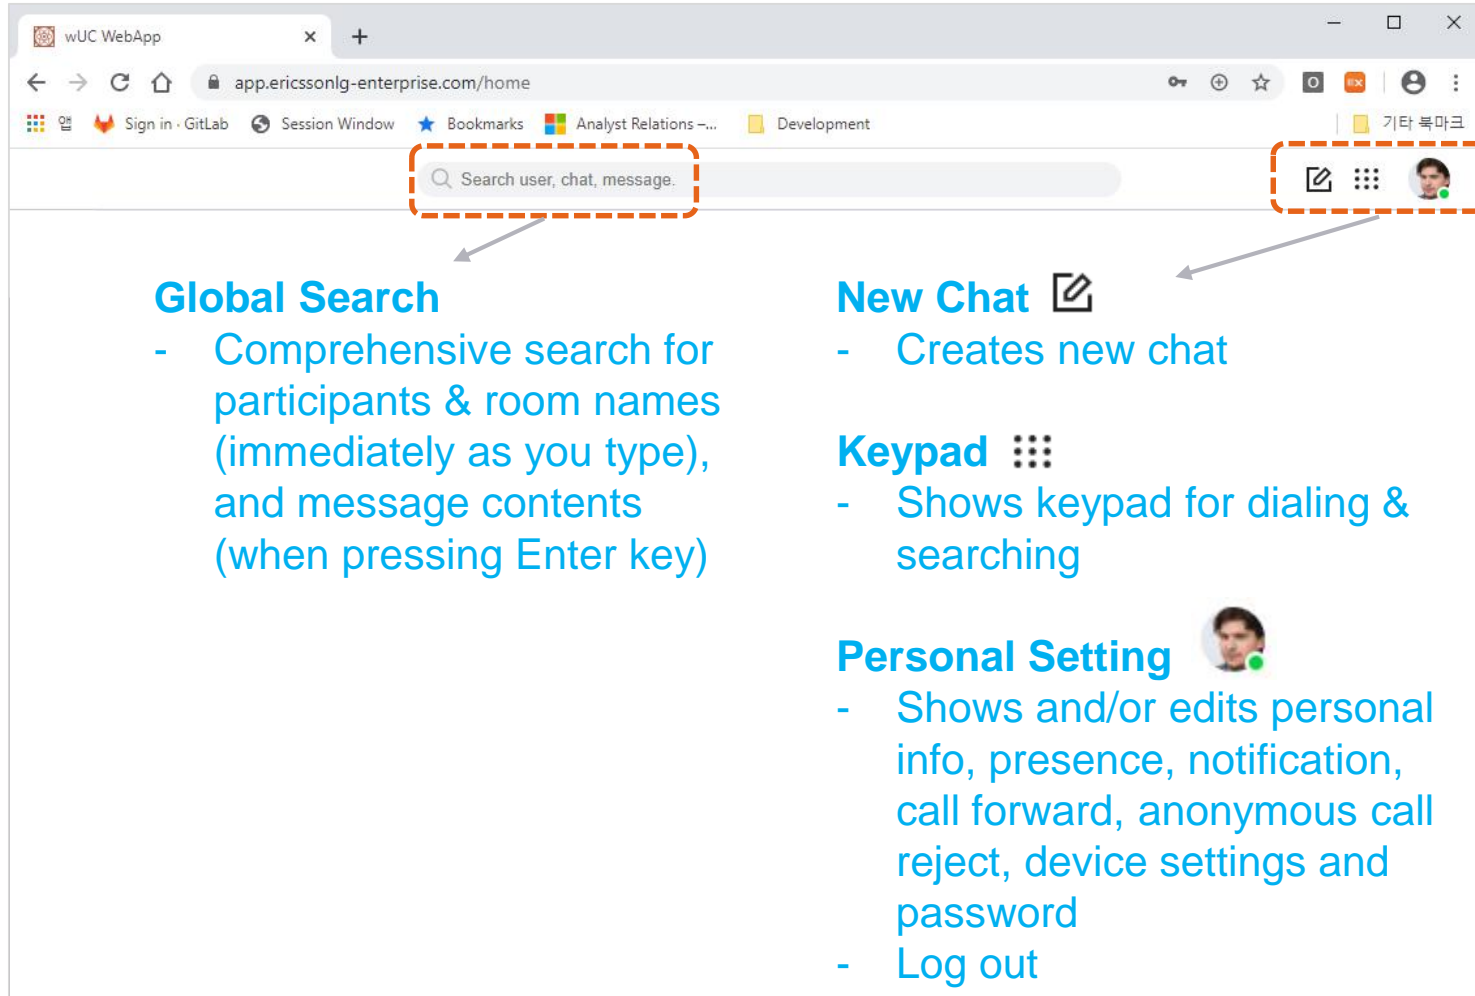

Go to Calls screen
- Call logs (All call, Missed call)
- Keypad (for dialing & searching)
- Voice mail, Pickup, Unpark, Barge in

Go to Chat screen
- Chat list (Favorite, Recent)
- Chat area
- Participants, Search, Files, Setting

iPECS ONE – Web Client: Home

Global search, new chat, keypad and personal settings.

Global Search
- Comprehensive search for participants & room names (immediately as you type), and message contents (when pressing Enter key)

New Chat ✎
- Creates new chat

Keypad ⦂⦂⦂
- Shows keypad for dialing & searching
